Help Employees Stay On The Job And Be More Productive!

PV5D

Introducing The Protocol Corporate Medical Vending Program.

- **Increased productivity.** Protocol machines offer employees immediate access to personal products...allowing them to return quickly to their duties. Your company's healthcare professionals can now spend more time productively on other projects.
- **Controlled availability reduces expenses.** Medical vending stops pilferage and reduces costs associated with standard first-aid boxes. It can also significantly reduce dispensing costs when healthcare professionals are on site.
- **Reduce potential liability.** Having employees purchase over-the-counter medications may relieve you of various legal implications.
- **Graphics that compliment your image.** Our vending machines have a professional appearance that compliment any décor, rather than cause a visual distraction. A variety of decal choices are available.

- **You'll satisfy employee needs.** Studies show employees appreciate the convenient access and easy operation of this equipment. With over 40 personal products available, you'll satisfy virtually any need.
- **Choose from a diverse and durable line.** No other company offers such a broad range of equipment (3, 4 & 5 column machines available) and product diversification. Each product is dispensed by a separate coin mechanism for unmatched reliability and accountability. Out-of-stock items are not an issue, as Protocol machines have a large capacity of up to 800 products.
- **Our programs are simple.** Enjoy the benefits of a reliable vending service without the headaches. We'll purchase, install, and maintain the equipment.
- **No maintenance means cost savings.** Not only do we provide routine preventative maintenance, we also make sure that any necessary repairs are made in a timely manner. Quick customer service is only a toll-free call away.
